

## Luminate Web Services Release 1.34

Version 1.34 of **Luminate Web Services (LWS)** addresses bugs and adds improvements.

**Luminate Web Services**, version 1.34, is scheduled to be released on July 6<sup>th</sup>, 2021.

**Reminder about email opt-in:** As of LWS 1.32, new and updated constituents are opted-out of email by default. To opt constituents into email when using the [Create](#) or [Update](#) operation, include the **AcceptsEmail** parameter with the value of **true**.

### Resolutions and Updates

#### 3507 **SessionLimitFault is not published on the WSDL**

**SessionLimitFault** is now defined on the WSDL and listed as a thrown fault for [StartSynchronization](#). By default, the session limit is set to 1 sync session at a time per site.

**Note:** You may need to update your application to explicitly catch **SessionLimitFault** or the application may fail to compile.

#### 2832 **The Query result is incorrect when querying on IsOffline field for donation form objects**

The [DonationForm](#) object has a new field named **InteractionMode**. Use the **InteractionMode** field to return results based on whether the donation is online, offline, or either.

Possible values are:

- ONLINE\_ONLY
- OFFLINE\_ONLY
- ONLINE\_OFFLINE

#### 1555 **Fields available in the Donation object aren't available in objects like TeamRaiserGift**

To provide additional fields in other objects so you can retrieve data on transactions that aren't plain donations, the [PersonalFundraisingGift](#) and [TeamRaiserGift](#) objects now have the **FairMarketValue**, **NewDonorStatus**, and **TaxDeductibleValue** fields.

The [ProductOrder](#) object has the **FairMarketValue** and **NewDonorStatus** fields.

**5180 An Unexpected Server Fault error returns when an EndSynchronization call doesn't include a header element**

A correct error message is now thrown for missing sessions on **StartSynchronization**, **EndSynchronization**, and **GetSynchronizationLog**.

**6069 Add incremental updates based on send\_started\_date or stats\_last\_updated for email deliveries**

**GetIncrementalUpdates** for **EmailDelivery** now looks at when the time delivery stats were last updated when considering records that qualify for download.

**6766 Using GetIncrementalInsertsCount to pull refunds sometimes pulls transactions instead of refunds**

**GetIncrementalInserts** for [Refund](#) now correctly includes refunds made prior to the sync window if the constituent was added to the partition during the sync window.

**6808 LWS server faults occasionally have an invalid namespace for certain elements**

An update was made to correct invalid namespace entries for certain elements when the service is unavailable.

**1797021 The WSDL doesn't properly describe the FullReceiptNumber field**

The **FullReceiptNumber**, **ReplacementReceiptNumber**, and **OriginalReceiptNumber** fields on the [ReceiptNumber](#) object are now listed as string fields to match possible **Luminate Online** values.

## Summary of Application Behavior Changes in This Release

### Fields Added to Existing Types

Field added to the [DonationForm](#) type:

- **InteractionMode**

Possible values are:

- ONLINE\_ONLY
- OFFLINE\_ONLY
- ONLINE\_OFFLINE

Fields added to the [PersonalFundraisingGift](#) type:

- **FairMarketValue**
- **NewDonorStatus**
- **TaxDeductibleValue**

Fields added to the [TeamRaiserGift](#) type:

- **FairMarketValue**
- **NewDonorStatus**
- **TaxDeductibleValue**

Field added to the [ProductOrder](#) type:

- **FairMarketValue**
- **NewDonorStatus**
