## **Convio Web Services Release 1.14**

Version 1.14 of Convio Web Services is now available. Please see release notes below for further details on what is included in this release.

## **Release Notes**

This is an emergency patch to address the bug #60529.

## **Defect Fixes**

Bug #60529 — Due to a problem in the CWS cache, invalid errors could be returned intermittently: "(method name) is not supported for record type (type name)." This problem has been fixed.

## **Known Issues**

Bug #56649 — Specifying a PageSize parameter for a GetIncrementalInserts, GetIncrementalUpdates, GetIncrementalDeletes operation that is different from the PageSize parameter specified for the previous corresponding GetIncrementalInsertsCount, GetIncrementalUpdatesCount, or GetIncrementalDeletesCount operation in a sync session results in unexpected behavior. If a larger PageSize is specified in subsequent calls, only the number of records specified in corresponding GetIncremental...Count call is returned. If a smaller PageSize=n is specified, only the first n records are returned for each Page resulting in records being skipped in the page sequence. To work around this issue, always specify the same PageSize for all GetIncremental\* calls within the same sync session.
