Convio Web Services Release 1.16

Version 1.16 of Convio Web Services is now available. Please see release notes below for further details on what is included in this release.

Release Notes

This release adds fields to the Constituent and TeamRaiserClassification fields and addresses a client-reported defect.

Defect Fixes

65801   CWS: "X_CHECKOUT" described as TenderType in WSDL, but methods return "XCHECKOUT"

Application Behavior Changes

The following changes have been made in this release:

- **TeamRaiserClassification** type adds the **CreationDate**, **CreatedBy**, **LastChangeBy** and **ModifyDate** fields.

- **Constituent** type adds **PredupStatus** field.

Known Issues

Bug #56649 — Specifying a PageSize parameter for a GetIncrementalInserts, GetIncrementalUpdates, GetIncrementalDeletes operation that is different from the PageSize parameter specified for the previous corresponding GetIncrementalInsertsCount, GetIncrementalUpdatesCount, or GetIncrementalDeletesCount operation in a sync session results in unexpected behavior. If a larger PageSize is specified in subsequent calls, only the number of records specified in corresponding GetIncremental…Count call is returned. If a smaller PageSize=n is specified, only the first n records are returned for each Page resulting in records being skipped in the page sequence. To work around this issue, always specify the same PageSize for all GetIncremental* calls within the same sync session.
