Luminate Web Services Release 1.30

Version 1.30 of Luminate Web Services is now available. Version 1.30 is a patch to address bugs and improve support for organizational records.

Defect Fixes

LO-1434 Organization objects are now retrieved properly in Query

LO-855 GetIncrementalInserts and GetIncrementalUpdates now return the proper number of records per call on the EmailDelivery type

LO-1443 Querying PremiumLog no longer returns an error when using SubmitTime as a filter

Support for Organization Audit Trail Columns

New Organization columns are available which store organization record details for the date the record was created, who created the record, when the record was updated, and who did the update:

- created_by
- creation_date
- last_changed_by
- modify_date
