

Luminate Web Services Release 1.31

Version 1.31 of Luminate Web Services is now available. Version 1.31 is a patch to address bugs and improve support for organizational records.

Defect Fixes

LO-4158 Performance time was improved for running GetIncremental operations against the EmailDelivery object.

LO-4656 To create a connection between a donation and the premium associated with it, the DonationTypeeld field was added to Payment for linking to PremiumLog. See also the “New field available in Payment Type” section below.

LO-4659 Querying the Payment object now returns all expected records.

Enhancements

New field available in Payment Type

To create a connection between a donation and the premium associated with it, the DonationTypeeld field was added to Payment for linking to PremiumLog.

- DonationTypeeld

Organization phone and address added to the Organization Type

The Organization Type was updated to include columns for an organization’s address and phone number.

- OrganizationAddress
- OrganizationPhoneNumber
